

Gender Pay Gap Report 2017

Sentamu Academy Learning Trust as an employer are required by law to carry out Gender Pay Reporting under the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017. This involves carrying out six calculations that show the difference between the average earnings of men and women in our organisation. We are required to publish the results on our own website and a government website.

We can use these results to assess:

- the levels of gender equality in our workplace
- the balance of male and female employees at different levels

Supporting narrative

Teaching staff pay scales are aligned to the School Teachers' Pay and Conditions document which is reviewed nationally on an annual basis. All non-teaching support staff pay is aligned to pay scales set by the National Joint Council for Local Government Services. Staff progress through pay scales for their grade/role based on performance through a robust performance management process, irrespective of gender*.

The difference in the terms and conditions of our two categories of staff affect the way in which hourly pay is calculated. Teacher's hourly pay has been calculated based on 32.5 hours per week term time plus five training days (37 hours for those on leadership and not subject to 1265 restrictions) and 28 days holiday pay. i.e. annual salary /223/6.5. We recognise that in reality our teaching staff work additional hours of work but have taken the decision to standardise the calculation. Non-teaching staff salaries are based on a full time equivalent of 37 hours per week all year round.

You will note that when the calculations are applied to different groups of staff, teaching and non-teaching, the pay gap is much smaller indicating that the pay is more evenly distributed amongst male and female staff within each staff group type.

Sentamu Academy Learning Trust is an equal opportunities employer and does not discriminate. We ensure that our job roles are evaluated to ensure fair pay in each role and advertise each job with no gender bias.

We believe that the pay gap is representative of the gender of applicants to vacancies across the trust particularly in the upper and lower quartiles.

In light of these findings the Trust will continue to monitor the pay gap in our organisation.
